## Instalación del Hardware

### Insert device USB interface into device

In the following figure, the USB interface of the network card is inserted into the device that wants WiFi to access the Internet. The network card can search for WiFi signals and receive signals so that the device can access the Internet wirelessly.

### Warning

1. Keep away from heat sources and keep ventilated.
2. In storage, transportation and operation environment, please pay attention to earthquake protection.
3. Prevention of other harmful substances, such as acid and alkali.
4. Do not disassemble without permission. If there is a malfunction, it should be repaired by professional personnel.

## Instalación del Software

After inserting the network card, click and run setup.exe to enter the installation interface automatically.

Windows 10/8.1/8/7/XP system software installation process is similar, the following installation to Windows 7 system as an example.

### Tips

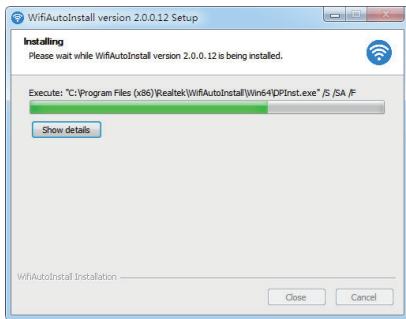

If the above interface does not automatically pop up, please double-click the desktop "My Computer" Or "Computer" icon  , enter the computer, double-click to run CD Driver  , wait a few seconds, you can start installation.

If the computer can't recognize the CD driver, please uninstall the other installed drive-free network card drivers at the control panel and reinsert the network card to start the installation.

## Conexión a redes

- 1 Please wait patiently for the network card to initialize, and the interface will automatically close after completion.

After installation, the wireless connection icon  will appear in the lower right corner of the desktop.

### Tips

If you install security software on your computer, it may prevent you from installing it. Please allow the installation operation in the security software.

- 2 Connect the searched wireless network

Click on the icon  in the bottom right corner of the desktop and select the network to connect in the pop-up list. For wireless networks, click the "Connect" button. If your connection signal has a password, please enter the corresponding WiFi password according to the prompt.

## Preguntas frecuentes

1. Why is my computer inserting a network card and not responding?

Answer: Maybe your computer has turned off automatic playback. Double-click "My Computer" or "Computing" on the desktop. Double-click the icon  in the pop-up window to install. If it cannot be installed, please Double-click setup.exe in the pop-up window to reinstall.

2. Why does my computer have no  icon?

Answer: Maybe you are now connected to the cable, so the icon becomes , click on the icon. Pop up the wireless signal search list and click on the corresponding password to connect.

3. Has the computer  icon been flickering?

Answer: Maybe your USB interface is out of touch. Please try inserting the network card into another USB Interface.
